Transforming Children into **Future Leaders**

Cir:002/23-24

Dear Parent, Greetings!!!

Sri Chaitanya Educational Institutions began in 1986 and quickly became a prominent leader in providing contemporary education. Its establishment was driven by a visionary outlook rather than a mere institution setup. Sri Chaitanya revolutionized education in India by introducing a systematic approach.

We foster talent through dynamic and achievement-oriented education programs for students in the K-5 segment. Our focus is on supporting infrastructure, innovative teaching methods, and facilitating diverse learning levels.

Star Kids Program and Young Learner's Program

Star Kids is our Preprimary program and Young learner's are our primary Program from regular stream. A well structured program with Scholastic and Co-Scholastic areas of learning to ensure every child every possibility to have a rich schooling experience.

Star Mavericks and Young Mavericks Program

Mavericks is an exclusive program to Sri Chaitanya at K-5 Segment. Its exclusivity is the "Learning Approach" that connects the Brain research to the school curriculum at Preprimary and Primary levels. It's scientifically proven that a child's capacity to grasp learning gets manifold in a positive, constructive, and fun-filled habitat.

Absorbing Concepts Faster, Remembering for Long time, Retrieving information Easier, Comprehending Better and Applying smarter are few of the outcomes from this program. Choose Mavericks pedagogy, which is fun, interactive, and learner-centric, and boosts not only IQ but also EQ and CQ.

Digital Learning Experience

Through digital education, classroom teaching has become more engaging and interactive. We have been emphasizing on digital education for the past several years and so were able to make our learning system very successful even during pandemic times when the physical schools were closed. We support our children with both Digital learning app (Infinity Meta Junior) and digital class rooms to make their learning rich, engaging and interactive.

Learning Beyond Book

We believe that children must be lifelong learners. We motive our students to gain hands on learning with real world experiences through a wide range of activities like **Project Days, Events & Celebrations, Inter-school Competitions, Club Activities, Educational Tours, Language Enhancement Programs** etc. All these promotes over all development especially personal and social development among our students. We endeavor to become an extension of the family's home, catering to the social, emotional, intellectual, and Academic needs of students in which happiness and well- being of every child is our priority.

We thank you for trusting us and entrusting your child in our school. We ensure that your child will get tools and opportunities to learn and grow joyfully.

We welcome you to a new school year 2023-24

Mrs. MALATHIRAJA,
Principal.
